Materials, Objects and Structures Quiz

1. What materials are these objects made from?

Metal

Wood

Plastic

Cotton (Fabric)

2. Describe the object using all five of your senses.

Sense	Observation
Sight	Blue, Shiny
Hearing	No sound, Makes a "ting" noise if tapped.
Smell	No smell
Taste	Not allowed to taste in science class.
Touch	Smooth, Cold, Hard

*Used blue HBA mug

3. Match the descriptive word to the proper sense.

fragrant		
sparkly		
dull		
hot		
sour		
loud		
sticky		

4. Match the object to the purpose of that object.

			a. Cleaning
			b. Cooking
			c. Communication

b **c** **a**

5. The purpose of a spoon is to help us get food into our mouth. Explain how a spoon has been made to suit that purpose. Talk about the material used, and observations made by your senses.

A spoon is made of something hard (metal, plastic, wood) so that it holds the food.

A spoon has no smell because you need to put it near your nose while you eat.

A spoon is not sharp because it could cut your mouth.

A spoon is small so it fits in your mouth.
