

On _____ we will be writing a science quiz on Materials, Objects, and Everyday Structures. The quiz will consist of some matching questions, some single word written answers, and one written sentence questions. All questions will be read orally as well as be written out on the test, and assistance will be provided in writing answers. All questions will be based on the activities we have done in class. Below you will find a copy of the quiz.

1. What materials are these objects made from? {Lesson 3} – *There will be pictures of a variety of objects for which students will have to indicate the material used, similar to their worksheet.*
2. Describe the object using all five of your senses. {Lessons 6 and 7} – *An object will be placed in the middle of the room, students will fill out a blank table similar to the one on their worksheet.*
3. Match the descriptive word to the proper sense. {Lesson 5} – *There will be a list of words and a picture to represent each of our senses, this will be similar to the second activity on their worksheet.*
4. Match the object to the purpose of that object. {Lesson 8}
5. The purpose of a spoon is to help us get food into our mouth. Explain how a spoon has been made to suit that purpose. Talk about the material used, and observations made by your senses. {Combination of learning from all lessons}
