

Home Water Use

Dear Parent

As part of our study on air and water in the environment the grade 2 students will be tracking the water usage in their homes over the next week. They will be bringing home a tracking sheet that will allow them to draw a check mark on the sheet each time something is used (toilet, shower, dishwasher, etc). Please help to remind them to continue to track the usage for one complete week. They are then to bring the sheet to class on **Friday February 18th**. If you child has not brought home their tracking sheet you may print a new one from Mr. Collinson's webpage (follow the links form the John T Tuck home page).

Also, the grade 2 homework for **tonight** is for each student to count all of the water sources in their home. If you could please assist them in this, it would help them to see that it is more than just a few sinks from which water is delivered (don't forget outdoor sources and obscure sources like hot water tank release valves – a good opportunity to talk about home safety).

If you have any questions, please feel free to contact me.

Mr. Collinson
