# WOOD ENERGY

Label the picture with the following words:

Roots	Bark	Trunk	Branches	Leaves	Seeds
-------	------	-------	----------	--------	-------

Copy the information about wood energy on the back of this paper.

Name: \_\_\_\_\_

Date: \_\_\_\_\_

The sun gives plants energy to make their own food. Plants also take water from the ground to grow. Wind helps to carry seeds so that a new plant can grow. People can get food from plants and can use wood as energy.

Cut out the pictures of the wood cycle and glue them below.
