

Hurtful Animals

Animal	How does it hurt us?	Why would it hurt us?
Bear	It could bite or claw us.	Some bears will attack people randomly, but most only attack to defend their territory or family.
Termite	They eat wood, which our houses and other belongings are made from.	They need food, they do not know they are hurting us.
Snake	They could bite us, and some snakes have poisonous venom.	Some snakes will attack humans (children) for food. Most only attack out of self-defence.
Moose	They could charge us, or they could get in the path of our vehicle.	A moose will only attack if it feels it is threatened. A moose who is hit by a car had no intention on hurting us.

Animal	How does it hurt us?	Why would it hurt us?
Bee	It could sting us.	If it feels threatened it will sting in self defence.
Dog	Some people are allergic to dog fur. Some dogs will attack humans.	Dogs do not know we are allergic, so do not do it on purpose. Dogs who attack humans normally only do it to defend themselves or family.
Shark	A shark can bite us.	Sharks view humans as food, and will attack us to eat us.
Worm	They can damage our food.	The worms are not hurting us on purpose, they are only getting the food they need.
