

Movement Test Review

Starting _____ we will be writing our end of unit test on Movement. The test will consist of a true and false section, some fill in the blanks, some labelling questions and a few sentence answer questions.

Here are the main concepts that will be tested:

- Force, which is a push or pull, is needed to make something move.
- There are many different ways to move (example, turning, jumping, etc).
- There are six simple machines.
 - You will need to match they each type to a description using fill in the blanks.
 - You will need to match each type of to a picture of that simple machine.

These are the last four questions on the test:

- A bicycle is a mechanism that uses many different simple machines.
 - Name the simple machines on a bicycle.
 - How does a bicycle make life easier for humans?
- Explain how simple machines help humans.
- Explain how simple machines can be bad for humans.
- Explain how simple machines can affect the environment.
