# Change of State

When a solid is heated enough it will turn into a \_\_\_\_\_.

When a liquid is heated enough it will turn into a \_\_\_\_\_.

When a gas is cooled enough it will turn into a \_\_\_\_\_.

When a liquid is cooled enough it will turn into a \_\_\_\_\_.

If it rains in the winter, and gets very cold at night, what could happen to the roads?

---

---

---

---

Why might it be dangerous if that happens to the roads?
