# Change of State

When a solid is heated enough it will turn into a liquid.

When a liquid is heated enough it will turn into a gas.

When a gas is cooled enough it will turn into a liquid.

When a liquid is cooled enough it will turn into a solid.

If it rains in the winter, and gets very cold at night, what could happen to the roads?

The rain will turn into ice.

---

---

---

---

Why might it be dangerous if that happens to the roads?

Ice is slippery, it could cause an accident.
