

These pictures show other places where movement is slowed down or stopped by safety devices. Look at each picture. What causes the force that slows down or stops the movement?

Picture	The movement that is being slowed or stopped.	The thing that causes the force that slows down or stops the movement.
1 - Tire	The truck rolling forward/backwards.	Block <u>pushes</u> against the tire.
2 - Parachute	The quick downward movement of the person.	The air <u>pushes</u> up on the parachute.
3 - Boat	The boat drifting out in the water.	The anchor rope <u>pulls</u> on the boat.
4 - Baby Car Seat	The baby moving around in the car	The straps <u>push</u> against the baby.
5 - Air Bag	The person from moving towards the dash too quickly.	The air bag <u>pushes</u> on the person.
6 - Mouth Guard	The teeth hitting each other.	The mouthguard pushes on the teeth.
