# Using a Balance

A balance is a measuring tool that allows you to compare the weight of something to the weight of something else. With a balance you can figure out which of two items is heavier. You can also use a balance to determine the weight of something.

Use the balance to sort the objects from lightest to heaviest.

1. _____

2. _____

3. _____

4. _____

5. _____

6. _____

Use the balance to make equal weights of each substance.

_____ blocks = 1 bottle of water

_____ toy dinosaurs = 1 bag of sand

_____ cards = 1 block
