

Indicate if the following statements are true or false:

- | | | |
|--|------------------------------------|------------------------------------|
| 1. Soil founding Prince Edward Island is very black. | T | <input checked="" type="radio"/> F |
| 2. Moving air blows sand against rock and wears it away. | <input checked="" type="radio"/> T | F |
| 3. It takes just a few minutes to make soil. | T | <input checked="" type="radio"/> F |
| 4. Running water carries bits of sand and gravel. | <input checked="" type="radio"/> T | F |
| 5. It is impossible for water to break rocks. | T | <input checked="" type="radio"/> F |
| 6. Tiny plant roots can split apart a rock. | <input checked="" type="radio"/> T | F |

Fill in the blanks:

- Air helps to make soil when moving air or wind blows sand against rock and wears it slowly away.
- Water splits and ships rocks by freezing and expanding.
- As earthworms travel through the soil in search of food, they produce waste that makes the soil more fertile.
- Plants help keep soil in place so it will not blow away.

On G.O.O.S. paper make a series of true/false questions and fill in the blanks to quiz one of your classmates. When you are done, find someone to exchange with.
