

1. Where is the only place on Earth where you can find a Vancouver Island Marmot?

Vancouver Island, British Columbia, Canada

---

2. About how many of this type of marmot are left in the wild?

Only about 100 as of last count.

---

3. How can you tell a Vancouver Island marmot from other marmots?

You can easily recognize a Vancouver Island marmot by its chocolate brown fur and white patches. They also have a unique call.

---

4. Why are these marmots endangered?

In the last few decades, clear-cut logging has taken away their home.

---

5. What are some different ways that marmots use soil in their lives?

Marmots build huge maze-like underground tunnels. This means that marmots live in the soil. During the winter months, marmots also hibernate in the soil.

---

Marmots eat flowers and grasses, which are grown in the soil.

---

6. Why do you think it is a good idea to make Mukmuk a character for people to learn about?

Answers will vary;

---

Should talk about extinction.

---

Helps promote awareness.
