

Finding Stable Structures

Get Started

Morgan and her friends are visiting a fun fair. Morgan's mother is an engineer. She has told them that if a structure is **stable** it will not topple over. See if you can help Morgan and her friends find stable structures.

Work On It

1. List all the structures that you see in the picture.
2. In what ways are the structures the same?
3. In what ways are the structures different?

4. a. Name one structure that is more stable than others.
b. Why do you think it is more stable?

Communicate

1. Write three questions about stability in structures that you would like to have answered.
