## Habitats

A habitat is a place where a plant or an animal lives. Different living things can live in the same habitat, but some live in very different habitats from one another. Some habitats are very small, yet some are quite large.

In the table below, compare and contrast your habitat to the habitat of a beaver. Try to keep similar points aligned.

My Habitat	A Beaver's Habitat
My house is above ground and made of wood and bricks.	A beaver's house is in the water and made of sticks and mud.
I travel very far to get my food.	A beaver's food is found near it's home.
My home has several things in it, like furniture and other belongings.	A beaver's home is nearly empty.
My entire family lives in my home.	A beaver's entire family lives in its home.
There are several other human homes around mine	There are not very many beaver homes in one area.
There are several other types of animals that live within my habitat.	There are several other types of animals that live within a beaver's habitat
There are several types of plants that live in my habitat.	There are several types of plants that live in a beaver's habitat.
I do not need to worry about being hunted in my habitat.	A beaver has predators that will enter its habitat.
