AMAZING ROCK FORMATIONS

Every day we see rocks and minerals that look quite ordinary. We don't pay much attention to them. They are part of our world that we take for granted. But there are also some amazing rock formations. No matter how many times we see them, we notice them!

Killbear Provincial Park, Ontario

Grand Île, Quebec

Dinosaur Provincial Park, Alberta

Questions:

1. Look at the pictures of the rock formations. In a small group, decide which you would most like to visit. Explain what makes this rock formation interesting. (Write answer on next page.)

2. Do you think these rock formations occurred naturally or were they created by people? Explain.

3. For each of the pictures at the start of this page, fill in the chart following question 4. You will need to state the name of the rock formation, the location where it can be found, what makes it special and you can add any other information you may know about the specific rock formation.

4. With your group, think about any amazing rock formations you have seen in your community or while on holidays. Continue the chart with these rock formations

Name	Location	What Makes it Special?	Other Information
