

Grade 7 Science

Unit 1: Introduction and Safety

Please have your completed experiment sheet and graph on your desk.

At this point, you are going to assign yourself a grade for both your write-up and graph. This is what you think you would get if I were to mark it... don't worry, it will not be marked.

When you have self-evaluated, take your work to the exemplars, and compare.

In your table group, discuss what you found when you compared your work to the exemplars.

Let's have a look at the exemplars as a class.
