

A background illustration featuring a complex molecular structure with blue spheres representing atoms and black lines representing bonds. The structure is set against a light blue gradient with faint, larger molecular shapes in the background.

# Grade 7 Science

## Unit 3: Pure Substances and Mixtures

A horizontal strip showing a portion of the molecular structure from the top page, with blue spheres and black bonds.

### Mix It Up

Today you will do \_\_\_\_\_ rotations.

We have about \_\_\_\_\_ minutes for class, so you will have around \_\_\_\_\_ minutes per station.

Remember that it is your responsibility to clean up at the end of each rotation. All equipment should be properly organized for the next group. If you are not the last rotation, you will leave the equipment on the desk in an organized fashion, and not return it to the counter.

At the end of the last rotation, all equipment is to be returned to the assigned spot on the counter. It needs to be returned exactly as it was found.

You will be doing a lab write-up. Remember to make detailed observations and notes!
